The Dangers of Pesticide Exposure
A Community Response Guide for California's San Joaquin Valley and Inland Empire
The Dangers of Pesticide Drift

Pesticides are chemicals that kill weeds, insects, and other pests.

Pesticides are designed to kill. Exposure to pesticides can make you sick right away and/or can be harmful to your long-term health. Pesticides are especially harmful to children.

Pesticide drift may be visible as a cloud of spray or dust, or you may notice an unpleasant smell or taste. You may even feel droplets. Pesticides can harm your health even if you don’t see, feel, taste or smell them.
Symptoms of Pesticide Exposure

Different pesticides cause different reactions. But if you’ve been exposed to pesticides, you may feel:

- eye, nose or throat irritation, difficulty breathing
- nausea, vomiting
- skin irritation, rash
- dizziness, tremors, muscle weakness
- headaches
- blurred vision, eye irritation
- stomach aches, diarrhea
- excessive sweating, fever

Maybe it’s not the flu?

Symptoms of pesticide exposure are often dismissed as colds, flu, diabetes, pregnancy, allergies, or hangovers. If you feel any of the above symptoms, especially if they appear quickly, think about where and when you may have been exposed to pesticides and see a doctor.
Long-Term Health Risks

Some effects take months or years to show up, such as:

- birth defects
- nervous system problems
- reproductive harm
- cancer
Pesticide Drift Is Illegal!

Report all pesticide drift, whether you are sick or not. See p.8

By law, your County Agricultural Commissioner must tell you what pesticide was applied and must investigate.

Farmworkers have these rights when they are exposed to pesticides at work:

Your employer must provide transportation to the doctor or hospital.

Your employer must pay for your medical care.

You cannot be fired for reporting drift or seeking medical attention.
How Are Pesticides Applied?

- **Ground Boom Sprayer**: Sprays down toward the ground
- **Soil Fumigation**: Sprays up and out
- **Aerial Application**: Sprays up and out
- **Ground Air-blast Applicator**: Sprays down toward the ground
What to Do If You Are Exposed to Pesticides

At home: Turn off your swamp cooler. Close the windows. If possible, carefully leave the area immediately. Call 911 if you are too sick to drive.

At work:
— Tell your supervisor immediately!
— Ask your supervisor what pesticide you were exposed to, and ask to be taken to a doctor.
— Tell your doctor the name of the pesticide, and ask them to report it.

Wherever you are exposed:
— Record everything and report it! See p. 8
— Change your clothes and shower with soap and warm water.
— If your clothes were hit, put them in a paper bag inside a plastic bag for possible testing.
See a Doctor Immediately If You Feel Any Symptoms of Pesticide Poisoning!

Tell the doctor what happened and what pesticides were involved.

Who will pay your medical bill?
If you were exposed at work, workers’ compensation insurance is required to pay. If you were not at work, the applicator or farmer may have to pay anything not covered by insurance.

Make sure your doctor reports the illness, as required by law.* Follow up with the County Ag Commissioner.

*By law, physicians must report suspected pesticide illnesses within 24 hours: https://oehha.ca.gov/pesticides/pesticide-illness-surveillance-pesticide-illness-reporting
Always Report Pesticide Drift!
How to Report:

Call the County Agricultural Commissioner (see p. 12 for contact numbers). It’s their job to take your report and investigate.

Download the CASPIR app from the California Department of Pesticide Regulation. You can use the app to report location and details, or send a video report. The state will notify your Ag Commissioner.

Write everything down! See p. 9-10

If you are seriously ill, call 911.
Record Everything!

Don’t worry if you don’t know all the answers, just record as much as you can. Keep any photos or videos, and make copies of the form for others to fill out, if needed. You can also submit photos or a video report on the CASPIR app, which maps where the drift happened.

Recording Form for Pesticide Exposure

1. Your name: _____________________________________________________________

2. Date of pesticide exposure: ___________ (month/day/year) Time: ___________ am/pm

3. The exposure happened while:  □ Working  □ Driving  □ At Home
   □ At School  □ Other __________________________________________________________

4. Location of exposure: (Be specific! Address, intersection, part of highway, school name, field block, residence, name of farm labor contractor or grower if known, etc.)
   __________________________________________________________
   __________________________________________________________

5. Weather conditions at time of exposure:  □ No Wind
   □ Wind: From what direction?___________How Strong?  Light / Medium / Strong
   □ Fog     □ Other __________________________________________________________

6. Did you feel, smell or taste anything at the time of exposure?  □ No  □ Yes
   If yes, what did it feel, smell or taste like? _______________________________________
   __________________________________________________________

7. What pesticide(s)? (if known)______________________________________________

8. Describe the exposure: (What were you doing? Was it a gas, a spray, from a helicopter, etc.?)______________________________________________
   __________________________________________________________
   __________________________________________________________

9. Did you see the pesticide being applied? If so, describe how (helicopter, tractor, sprayer, etc.) and estimate how far away it was. _____________________________
   __________________________________________________________
   __________________________________________________________
10. Who was exposed? Write the names and contact information of all people you know were exposed. Continue on the back or on another page if you need more space.

Name __________________________ Contact Info __________________________

Name __________________________ Contact Info __________________________

Name __________________________ Contact Info __________________________

11. What symptoms did you and others experience?

Allergy-like reaction
(sneezing & runny, itchy nose)

Follow up!

If you were exposed at work, did you tell your supervisor?  □ Yes  □ No

Did you save clothes that might have been contaminated in a bag?  □ Yes  □ No

Remember to report drift and exposure to the County Agricultural Commissioner immediately. Call community support groups if you need help! (see page 14.)

Filing a Report with the County or State

Report pesticide drift to your County Ag Commissioner. It's their job to investigate. Ask the Agricultural Commissioner to:

- Investigate the drift
- Tell you what pesticides were involved
- Test your clothes for pesticide residues
- Provide you with a report

To report pesticide drift, download the Department of Pesticide Regulation's CASPIR app on your mobile device. You can file a report anonymously, provide the exact location of the incident, and upload photos and videos.
If the County Agricultural Commissioner does not respond to your request, call the California Department of Pesticide Regulation and ask for enforcement.

About CPR

Californians for Pesticide Reform (CPR) is a statewide coalition of more than 190 organizations, founded in 1996 to fundamentally shift the way pesticides are used in California. CPR’s mission is to protect public health, improve environmental quality and expand a sustainable and just agriculture system by building a diverse movement across California to change statewide and local pesticide policies and practices.
